

BOBBALI CHETHAN REDDY

+91-8523826069 | bchethannreddy@gmail.com | github.com/bchethan | [LinkedIn](#)

Technical Skills

- **Data Analysis:** SQL (MySQL, SQLite), Python, Pandas, NumPy, Excel, Matplotlib, Seaborn
- **Tools:** Git, GitHub
- **Core Concepts:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization

Projects

Social Media Advertisement Performance Analysis | SQL • Power BI | [GitHub](#)

Technologies: MySQL, SQL, Power BI

- Analyzed social media advertising campaign data using SQL (MySQL) and built an interactive Power BI dashboard tracking impressions, clicks, CTR, spend, purchases, and ROI.
- Found users aged 18–34 drove ~74% of total purchases (25–34: 42.2%, 18–24: 31.7%), and recommended concentrating campaign targeting on this segment.
- Identified the US, UK, and Canada as the top three markets, contributing ~50% of purchases combined (US alone at 33%), informing budget allocation recommendations.
- Analyzed audience interest segments and identified Art, Technology, Gaming, and Travel as the highest-converting categories for future campaign targeting.

Brazilian E-commerce Sales Analysis | SQL • Power BI | [GitHub](#)

Technologies: MySQL, Power BI

- Analyzed ~100,000 orders across 9 relational tables (customers, orders, products, sellers, payments, reviews) from the Brazilian Olist e-commerce dataset using MySQL.
- Wrote business-focused queries using joins, CTEs, window functions, and subqueries to evaluate delivery performance, product category trends, and seller performance.
- Identified that Rio de Janeiro had the longest average delivery time (15 days) alongside a below-average customer rating (3.87/5), and recommended logistics improvements to reduce delays.
- Found the top-selling product category (bed_bath_table) carried a below-par review score (3.9/5) despite highest sales volume, flagging it for a quality/packaging investigation.

Activities & Learning

- Kaggle: Pandas, SQL courses; SIH hackathon participant

Education

Bharat Institute of Engineering and Technology, Hyderabad

Bachelor of Technology – Computer Science Engineering (AI & ML) | 2022–2026

Summary

Aspiring Data Analyst with hands-on experience in SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis, dashboard development, and translating data into actionable business insights.
